VIA University College (VIA UC) located in Denmark, is the largest institutions for further education in Northern Europe. The institution has a strong focus on research and development, making sure their programs are based on the latest knowledge. In addition, VIA UC cooperates closely with other university colleges throughout Denmark, as well as public and private companies to help develop industries and societal solutions.

VIA UC has successfully implemented itslearning for their teachers and students across their organisation and taking full advantage of the unique and powerful planner, assignment and assessment tools in itslearning.

“itslearning is intuitive and easy to use. Something that makes itslearning unique is the Planner feature. Students and teachers can easily have a great overview of their lectures, assignments, and deadlines in the platform. Moreover, we have found in itslearning a partner that we can trust with the right support at the right time.”

Mads Villesen, Educational IT consultant
