

## ITSLEARNING FOR ADVANCED REPORTING

### Insight you can act on

Welcome to a holistic suite of dashboards and analytics that will spike informed decisions for your school. Dive into the details of user engagement, curriculum management or student progress, or just get the overview you need. itslearning Advanced Reporting emphasises flexibility and customisation, to ensure that you can apply your understanding of the data to your specific priorities and practices.

IT'S LEARNING FOR  
**ADVANCED REPORTING**

Curriculum leaders want to know how different schools are performing regarding learning objective and subject area standards. They also want to quickly see what resources and assessments are available so that they can address gaps in the curriculum. IT leaders want to know the extent to which the learning platform is being used in order to identify groups of schools, teachers, parents etc. that might need more support in the use of itslearning.

A Head teacher would want to know if there are teachers or students who may be struggling so that they can provide additional attention or resources. All this information and more can easily be viewed using itslearning Advanced Reporting.

Ultimately, these reports serve as a road map for schools and student progress. They help teachers and school leaders provide remediation, to close the gap between current and desired levels of achievement. itslearning Advanced Reporting is an important aid in accomplishing what matters most: **improving student mastery.**

Report Feature	Free for all customers	Scope	Who has access?
Storage Report	✓	Full site	Admins
Login Report	✓	Full site	Admins
Course Reports	✓	Course	Course Teachers, Admins
Student Profile information	✓	Individual Students	Students, Teachers, Parents, Admins
Advanced Reporting (incl. Data Warehouse API)	Additional License Fee	Full site	Admins

## Let's explore what you can do...

### User Engagement reporting

- Monitor adoption to find schools, roles, or users that may benefit from training or assistance.
- View the time and extent itslearning is used for insight into use of blended learning.
- Explore the detailed extent of user participation.

### Curriculum Management reporting

- Evaluate curriculum implementation efforts by looking at the range and diversity of course content.
- Monitor learning objective alignment to support standards-based assessment.
- View patterns of use to find most vs. least used content types.
- Check progress on specific topics and skills to identify areas needing additional attention.

### Student progress reporting

- Compare student progress on learning objectives across schools, courses, and by topic.
- View detailed learning objectives assessment status and timeline.
- See a comprehensive view of any individual student's progress on learning objectives.

# Awesome reports in itslearning

These reports are templates with a range of views to select and modify, to best meet the needs of your schools.

Want to know to what extent your course elements, like assignments, tests or content links, are being used?

- Statistics and distribution of course element types and their uses. Compare organisations and courses.
- Options include distinguishing assessments from non-assessable content.
- Filter to view data from selected organisations, courses, and by element type or category.

Like a summary of course visits?

- Course visits over time and by course profile, day and time.
- Filter to view data from selected dates, organisations and specific courses.

## Need an overview of learning objectives progress across individual students or course levels?

- Compare totals across organisation, school, course level, or individual students, per learning objective.
- Detailed view of student progress in meeting and mastering objectives.
- Progress in assessment and status over time.
- Filter and sort to find most and least progress.

## Want to find out if courses, plans and course elements are appropriately aligned to learning objectives?

- Statistics and comparisons of learning objective alignment to courses, plans, and course elements; distinguishing assessments and learning objective assessment.
- Data can be viewed to compare organisations, courses, or learning objectives.
- Filter to choose objectives, organisations and courses.

## Want information about logins?

- Logins over time and by site profile, day and time.
- Filter to view data from selected dates and organisations.

## Would you like reports of user account activity?

- View trends and number of user accounts that have been active, inactive during a selected time period, or have never logged in.
- Select time period and compare organisation.

## How we can help *you*...

itslearning is an award-winning, cloud-based learning platform that helps teachers make education more inspiring and valuable for today's students. We provide a full range of services, from simple training sessions to full-scale implementation projects. Established in 1999, we have our headquarters in Bergen, Norway, with offices in Atlanta, Boston, Berlin, Enschede, Milton Keynes, Malmö, Mulhouse and Paris.
