STUDENT CENTERED TEACHING & LEARNING PLATFORM
Today's educators are struggling

As class sizes continue to grow, and standards become more rigorous, educators are finding it hard to keep up. Often working in isolation, teachers lack access to the resources and tools needed to successfully develop lessons that engage and help move their students closer to standards mastery.

On the curriculum side, it’s a daily challenge to make sure that these standards are adequately covered and assessed, and that courses and resources are consistent, aligned and accessible across the district. In addition, teachers, students and parents are overwhelmed by juggling countless user names and passwords to access resources and assignments on a myriad of platforms and websites.

Without the right systems and support to help address these issues, curriculum management becomes inefficient, teacher productivity suffers and ultimately, student achievement declines.
Ignite Your Learning

As a single end-to-end teaching and learning platform, itslearning is trusted by more than 4 million teachers, students, and parents worldwide to provide a streamlined, user-friendly learning environment for their districts. itslearning consolidates siloed systems and content resources, enabling districts to more easily manage their curriculum. More importantly, we provide educators with the flexibility and time savings needed to create truly personalized experiences that place students at the center of learning.

What kind of platform is itslearning?

Centralized
Curriculum guides, instructional frameworks, resources, student progress reports and communication tools are all located in the same platform – with only one login to remember.

Easy-to-use
Curriculum management tools like course templates, planners and the ability to align content to standards streamline course development for teachers, while our device-agnostic platform makes it easy for students to work on any of their devices.

Personal
With flexible feedback options and the ability for students to demonstrate achievement in the way they choose, teachers can increase motivation and engagement by empowering students to design learning experiences that are meaningful to them.

Engaging
With itslearning, students can reflect on and take ownership of their learning through blogs, discussion boards and ePortfolios. Students can also track their growth with Individual Learning Plans (ILPs), while parents, teachers and mentors can monitor progress via personal dashboards.

With the millions of students, teachers, district leaders and parents who use our platform every day – together, we shape the heart of education.

We provide what is most important to you: seamlessly integrated tools and practices for better education. We make your classrooms accessible anytime, anywhere and through any device – all to elevate teacher efficiency and facilitate student success.
itslearning: At the heart of ... 

itslearning is your one-stop shop to house and manage functions for creating and delivering courses, assessments, standards management, attendance, grades and more. With itslearning, everyone in your school system can work smart, collaborate and communicate — all in one, simple interface that works well on almost any device — from Chromebooks to tablets, and smartphones to laptops.
Curriculum
Plan, align and manage instructional resources from publishers, open educational resources and your own staff in one central library. Save time and promote best practices by sharing course templates and planners across the district.

Learning
Help students progress towards mastery by aligning resources and activities to standards, and giving concrete, actionable feedback using standards-driven rubrics. Provide voice and choice, personalization and encourage collaboration, while maintaining open communication with learners and parents.

Communication and Collaboration
Strengthen school community ties by providing safe spaces for groups of students and teachers to interact outside of the classroom, such as for school clubs or professional learning communities. Keep parents involved through a dedicated Parent Portal, with automatic updates on assignments and academic progress.

Personalization
Help students drive their own learning by allowing them to create and collaborate in courses and communities, as well as self-reflect in blogs, ePortfolios, and individual learning plans. Teachers can harness features such as the Recommendation Engine to make learning personal for each student.

Professional Learning
Increase effectiveness and productivity by providing teachers with a way to connect, collaborate and share. Use courses and rubrics to give feedback for classroom observations against professional learning standards. Model expectations by conducting professional development in the same platform in which teachers teach.

“Our learning hub, itslearning helps teachers plan, access district resources and promote student-centered learning.”
Michele Eaton, Virtual Learning Specialist
Wayne Township, IN
Why itslearning?

Not all learning platforms and providers are created equally. Developed specifically for K-12 classrooms, itslearning incorporates streamlined curriculum management functionality, and focuses on proven pedagogical strategies that drive student-centered learning.

More than just a vendor, we draw on our experience in project and change management to develop long-term partnerships with districts. We provide best-in-class functionality to help drive achievement; including standards mastery reporting, recommendation engine for remediation and review, master course templates and planner, personal dashboards with automatic updates, and rubrics for assignments and activities.

Whether you need to share data with your Student Information System (SIS), data warehouse, or other system; we work closely with you to develop and execute an integration plan that ensures the best possible process and outcomes.

Finally, itslearning is a platform your teachers will actually use. With professional development offered in a blended learning format directly in the platform, users will know exactly what is possible when they begin using the live system for the first time.
What others have to say

District:
“With the assistance of the itslearning implementation team, we have now aggregated over 1 million learning objects from various publishers in our district’s library. itslearning is now the central repository for content and resources used by teachers and students, and allows parents to share information and collaborate in the education process.”
Beatriz Arnillas, Director of Education Technology at Houston Independent School District, TX

Parent:
“What’s important as a parent is that itslearning is a communication tool. There’s no doubt about which assignments are due, when they’re due, and how they’re supposed to be delivered.”
Bill Kaufman, Parent
Lambert High School, Suwanee, GA

Teacher:
“itslearning allows students to take control of their learning and be engaged while doing so. Our UDL concepts come to life, students are more engaged, and are learning through methods that interest them.”
Margaret Denton, Teacher
Bartholomew Consolidated Schools, IN
itslearning is an award-winning, cloud-based k-12 learning platform that helps teachers make education more inspiring and valuable for today’s students.

We provide a full range of services, from simple training sessions to full-scale implementation projects. Established in 1999, we have our headquarters in Bergen, Norway, with offices in Atlanta, Boston, Berlin, Enschede, London, Malmö, Mulhouse and Paris.
