

Teaching and Learning in a Post- MBC World

Smooth Migration and Transition from MBC

Teaching and learning in a post-MBC world requires the stability of an established learning management system (LMS). itslearning is the longest-standing K-12 platform with a proven track record of successful LMS migrations. Help teachers easily transition by providing beginner or advanced accounts to fit a teacher of any level of tech proficiency.

Google- and- Office- Friendly

Easily integrate and edit Google and Office documents and files right within the itslearning platform.

Built for K-12

The itslearning platform includes a K-2 portal for early learners, and is geared towards learners in all grades, K-12.

Dynamic Curriculum Management

With itslearning, district curriculum leaders can efficiently create, deliver, update, and continuously modify curriculum guidelines (i.e. curriculum maps, curriculum guides) for easy access by teachers. Course content can be modified on demand, with all modifications reflected immediately for all users of the course content, ensuring the most recent curriculum and aligned resources.
